

EPLE TRIO - *Contemporary Scandinavian Jazz*

For nearly a decade, Eple Trio has developed their own distinctive interplay, where improvisation and melody plays vital parts. Their references are far reaching, goes well beyond traditional jazz music, and includes classical and folk music, contemporary and pop. The vital result shows itself as melodic lines focusing on a very dynamic improvisational form and suggestive rhythm. Musical interaction is always a key component, and it's more often than not, difficult to single out a soloist in this very energetic and diverse trio. Eple trio has released three albums, all of them receiving critical acclaim, and they have toured Norway, Belgium, and Japan.
